

Community Environmental Initiatives

Allegro® MicroSystems extends its commitment to the environment by encouraging its employees to be environment-aware in their business activities, and to participate in volunteer and community efforts that improve the local environment.

Earth Day

Each year for the past 22 years Allegro Worcester employees, family members, and friends have participated in an Earth Day clean-up sponsored by the Regional Environmental Council. Being one of 60 participating sites in Worcester, we clean along 1.5 miles of roads near Allegro as well as on Allegro property. This not only improves the local environment but also helps the next generation become aware of our environmental responsibilities.

View the images of the Allegro volunteers on the next page.

Every Day

To help reduce the use of fossil fuels, Allegro Worcester supports employee ride-sharing by helping employees connect with each other and by providing preferred parking for carpoolers. We also partner with the Massachusetts Department of Transportation (Mass DOT) to provide services including NuRIDE and the Emergency Ride Home program [MassRIDES - Home](#). In recognition of our efforts Allegro was given a Leadership Award for Excellence in Commuter Options in April 2011 by the Mass DOT.

Allegro Worcester also has a very active recycling program which recycles over 100 tons of material per year. This includes 32 tons of plastic, 27 tons of cardboard, 16 tons of paper, 16 tons of pallets, and 10 tons of metal.
